INTRODUCTION

This classification, the Australian Import Commodity Classification (AICC) will be used for Australian Import statistics for the year 1985-86. It is based on the second revision of the United Nations' Standard International Trade Classification (S.I.T.C.*) and is arranged in Sections, Divisions, Groups and Items of the S.I.T.C. The classification is further dissected into Import Statistical Items. The numbering system consists of seven digits. The first digit denotes the Section, the first two digits together denote the Division, the first three digits denote the Group, the first five digits denote the S.I.T.C. Item, and the full seven digits denote the Import Statistical Item.

Australian Import statistics are derived from documentation submitted to the Australian Customs Service under the Customs Act. Importers or their agents are required to provide details of their Imports according to the classifications of the Australian Customs Tariff (A.C.T.). The A.C.T. classification is equivalent to the Customs Co-operation Council Nomenclature (C.C.C.N.) at the 4 digit level (i.e. the first four numbers) but also provides a finer dissection of Imports for Customs purposes, through subdivisions at the 5, 6 and 7 digit levels. At the same time, Importers are asked to specify their Imports for statistical purposes according to the Statistical Codes which are at the 11 digit level of the A.C.T. This enables a concordance between these Tariff Items and Import Statistical Items of the AICC. Whilst the A.C.T. is identical to the C.C.C.N. at the 4 digit level, there is also a relationship between the 4 digit C.C.C.N. items and the 5 digit S.I.T.C. items of the AICC. This relationship is shown according to S.I.T.C. items of the AICC to C.C.C.N. items on pages 333 to 341 and C.C.C.N. items to S.I.T.C. items of the AICC on pages 343 to 350.

The Interpretative and explanatory notes of the C.C.C.N. may be used when interpreting the meaning of goods classified under the S.I.T.C., since they apply to both classifications with equal force.

A small number of changes have been made to the S.I.T.C. where it is not suited to Australia's Import commodity trade. In these cases, a new 5 digit number which does not appear in the United Nations' Classification has been used. The key on page 332 shows where 5 digit items used in this classification are not equivalent to S.I.T.C. items as defined in the United Nations' Classification. In a number of cases, the descriptions of S.I.T.C. groups and items in the AICC are different from those appearing in the United Nations' Classification. Some of these differences merely represent the substitution of Australian terminology. In other cases, variations have been made in order to amplify the description of the commodities involved. For example, variations occur in S.I.T.C. Division 32 of the AICC which covers Coal, Coke and Briquettes, since investigations have revealed the necessity to combine S.I.T.C. Groups 322 and 323 into a new Group, 325, which covers the whole of Division 32. The structure of the present Classification and the United Nations' Classification also differ in that Section 9, Commodities and Transactions not Classified According to Kind, has been divided into two parts to allow for a clearer presentation of the distinction between merchandise and non-merchandise trade. In the AICC, Section 9 (b) contains all items of non-merchandise trade and the allocation of commodities in this category are in line with the recommendations of the United Nations' Statistical Commission. Another difference lies in the omission of S.I.T.C. item 351.00 which refers to Electric Energy since this good is inapplicable to Australian overseas trade.

Changes between Import Statistical Items for 1 January 1986 and those now operative are shown on pages 371 and 372.

The list showing Unit of Quantity Abbreviations, on page vii will assist in interpreting the units of quantity shown in the Classification and in relevant overseas trade statistical publications issued by the ABS.

Amendments to this classification, which take the form of reprint pages, will be issued by the ABS as necessary.
